360.*

这些应用一般采用标准的支持 HTTPS 协议来文件上传/下载，引擎都能捕捉到。
Zhèxiē yìngyòng yībān cǎiyòng biāozhǔn dì zhīchí HTTPS xiéyì lái wénjiàn shàngchuán/xiàzài, yǐnqíng dōu néng bǔzhuō dào.
These applications generally use the standard HTTPS protocol for file upload/download, which the engine can capture.

Note：
对于文件上传操作,目前只过滤不包含扩展名的文件。
Duìyú wénjiàn shàngchuán cāozuò, mùqián zhǐ guòlǜ bù bāohán kuòzhǎn míng de wénjiàn.
For file upload operations, only files that do not contain an extension are currently filtered.

对于文件下载引入一定的智能行，会对 content-type 做一定的过滤，因应用会自动下载大量脚本文件，图片文件，配置文件等。
Duìyú wénjiàn xiàzài yǐnrù yīdìng de zhìnéng xíng, huì duì content-type zuò yīdìng de guòlǜ, yīn yìngyòng huì zìdòng xiàzài dàliàng jiǎoběn wénjiàn, túpiàn wénjiàn, pèizhì wénjiàn děng.
Introducing a certain intelligent line for file downloading will filter the content-type, because the application will automatically download a large number of script files, image files, configuration files, and so on.
